INCORPORATION.

The Isometrical Truss Bridge Company has been incorporated under the act of Assembly of the State of Pennsylvania for such purposes made and provided, and the business objects of said company are fully set forth in the following extract from the corporate agreement:

“In order that we may be and remain a body corporate, under the name and style of The Isometrical Truss Bridge Company, for the purchase and sale of United States letters-patent, granted to J. Dutton Steele, on the 9th day of April, A.D. 1867, for the Isometrical Bridge Truss, and also for the purchase and sale of other United States letters-patent for improvements in truss bridges, the sale of rights and granting of licenses under said patents, or any of them; also for the construction of bridges, and for enjoying all the rights and privileges conferred by said act of Assembly.”

The Board of Managers being desirous of offering every facility to parties wishing to test the merits of the Isometrical Truss, will furnish plans and estimates and, if desirable, secure the erection of bridges upon this system in any part of the United States.

The office of the company is situated in Pottstown,
