

INDEX.

APPENDIX,	pages 122 to 250
ERRATA, in OLD PRINT, See Original Preface, p. iv; also, pages	125 & 126.
" " in NEW PRINT, See Back of New	
GENERAL TITLE-PAGE.	
" in CENTRAL FORCES, correct as follows.	
1. In lines 17 & 18, page 7,—for expression $\frac{v^2}{R}$	
read.. <i>Centrifugal Force</i> .	
2. Line 20, same page, for R'^2 , read R' .	
Fundamental Principles discussed,	Page 2 &c.
Analysis of Action upon, and Comparative Economy of, different forms of TRUSSING.	8 to 20
Easy practical Method of Analysis for Cancellated Trusses,	127 to 159
Decussation of Forces, in certain cases,	149—159
Inclination of Diagonals—most economical,	29—34, & 160—161
Depth of Truss, (ratio of Depth to Length,) 34—37, &	162—166
Relative economy of IRON & WOODEN BRIDGES,	39—44
IRON BRIDGES. Strength of Iron,	51—66
ARCH-TRUSS Bridges,	66—74, 186, & 200—209
Cancellated Truss, (Truss with parallel Chords,) 75—82, &	210—217
LINK Chords, and PLATE Chords	218—232
Wrought Iron Bridges, alluded to,	233—234
Wrought and Cast Iron Bridges, Comparison of Plans,	167.
Bollman Truss, page 167. Finck Truss,	171.
Post's Truss, ,, 174. Whipple' Trapezoidal,	180.
Synopsis of the results of Comparison of said Trusses,	182.
COUNTER-BRACING, its effects and value,	187—198
WOODEN BRIDGES; Strength of Timber, Positive,	
Negative, Lateral, and to resist Cleavage,	93 to 98, and, 235.
Splicing Timber,	99—100
Wooden Trusses, ,, 100 ,, 118 ,,	235—248
MODULUS of Strength of Bridge trusses,	248—250
