1926

BEHRE, CHAS. H., Jr. Structures in the Slates of Northeastern Pennsylvania (abstract).
Brief descriptions of the different members of the Martinsburg formation and prevailing structures.

Contains descriptions of the raw materials and the processes of manufacture of portland cement in the Lehigh District.

MILLER, B. L. Taconic Folding in Pennsylvania.
Evidence presented to prove period of orogenie activity at close of Martinsburg deposition and pronounced unconformity between Martinsburg and Shawangunk formations.

1927

BEHRE, CHARLES H., Jr. Slate in Northampton County, Pennsylvania.
An exhaustive account of the stratigraphy, structure, and economic features of the slate region of Northampton County. Most of the features described apply equally to the slate district of Lehigh County.

STOSE, GEORGE W., and JONAS, ANNA I. Ordovician shale and associated lava in southeastern Pennsylvania.
Discusses relations of the Martinsburg, Leesport, and Allentown formations in the Egypt and Limeport regions.

STOSE, GEORGE W. Possible Post-Cretaceous Faulting in the Appalachians.
Suggests the correlation of the Kittatinny and Schooley peneplanes. The greater elevation of the peneplane on Kittatinny Mountain as compared with the one developed on Scott and Schooley Mountains (N. J.) is explained by normal faulting in post-Cretaceous and pre-Harrisburg peneplaination time.

1928

Describes particularly the structural features of the Martinsburg slates of the Lehigh slate district.

DONEHOO, GEORGE P. A History of the Indian Villages and Place Names in Pennsylvania.
290 pp., Harrisburg, 1928.
Important geographic information concerning Lehigh County. The following topics are discussed: Delaware Indians, Hockenschauqua, Lehigh, Muncungie, Monocacy, Saucon, etc.

ECKEL, EDWIN C. Cements, Limes and Plasters.
Contains many descriptions of the cement industry of the Lehigh Valley.

PENNEMAN, NEVIN M. Physiographic Divisions of the United States, 3d ed.
Map shows the different physiographic divisions represented in eastern Pennsylvania, with brief descriptions in the text.
