BIBLIOGRAPHY

Pennsylvania Topog. and Geol. Survey Report, 4, 191 pp., 29 plates,
9 figures, Harrisburg, 1911.

Short description of the pre-Cambrian, Cambrian and Ordovician formations of
Northampton County. Some other, black slate andumber deposits of the county
are described.

MILLER, BENJAMIN L. Paint Shales of Pennsylvania.

Brief statement of the use of Martinsburg shales of Northampton County for black
paint.

PECK, FREDERICK B. Preliminary Report on the Talc and Serpentine of
Northampton County and the Portland Cement Materials of the Lehigh
District.
Pennsylvania Topog. and Geol. Survey Report, 5, 65 pp., 17 plates,
9 figures, Harrisburg, 1911.

Describes the talc and serpentine deposits in Chestnut Hill and other pre-Cambrian
rocks of Northampton County. The Cambrian, Ordovician and early Silurian strata
of the Lehigh Valley are also described as well as the cement industry of the region.

READING, JOHN, JR. Diary, 1715.
In possession of New Jersey Historical Society. Abstracts published in
History of Warren County, New Jersey, by George Wyckoff Cummins
(p. 14-17), New York, 1911.
See Reading, John, Jr., 1715.

SCHÖPF, JOHANN DAVID. Travels in the Confederation (1783-1784).
Translation of “Reise durch einige der mittlern und südlichen vereinigten
nord amerikanischen staaten und nach den Jahren 1783 und 1784.”
Two parts, Erangen, 1788. Translated and edited by Alfred J. Mor-

The author spent some time at Bethlehem and Nazareth and has described the
topography, geology of the soils and industries of the inhabitants of these as well
as the forests crossed by him in journeys to the Wind Gap. Describes streams,
springs, sink holes, rocks, etc. He speaks of the “Lehigh River” as “a soft, clear,
pure stream flowing over a rocky bottom.” Says the limestone valley was covered
with forests consisting “for the greater part of white, red, and black oak” and the
slate hills covered with the “bush oak” seldom three to four feet in height.

ULRICH, F. O. Revision of the Paleozoic Systems.
Briefer describes geologic features of the Lehigh Valley in various places (pp.
644-646, 655, 665-666, etc.)

1912

CLARKE, JOHN M., and RUEDEMANN, RUDOLF. The Eurypterida of New York.
New York State Museum, Memoir 14, 628 pp., 68 plates, Albany, 1912.
The following eurypterid forms are described (pp. 417-418) from some thin
seams of black slate in the Shawangunk formation in the Delaware Water Gap:

Deltakiepterus oclusis Clarke.
Eurypterus maria Clarke.
Rhyolurus aff. myops Clarke.
Hughenotheria shawangunk Clarke.
Pterygytus aff. globiceps Clarke & Ruedemann.

COONS, A. T. Slate.
Washington, 1913.

In addition to statistics there is a general discussion of the economics of the slate
industry and methods of working. Frequent reference to the slate of Northampton
County.

GLACE, WILLIAM H. A Narrative of Hydraulic Cement mined in the Lehigh
Valley.
16 pp., 3 plates, Catasauqua, 1912.
A sketch of the beginning of cement manufacture in the Lehigh Valley.
